Commissions Scope 11/16/2023

# Commissions Scope

## **New Commissions Functionality**

#### Problem definition

Currently there is no place for Haze employees to give special users the ability to administer the current interest rate for overdue order payments nor commission rates for sales people with respect to the company and product.

#### Metrics and goals

The users at WaxWing would like the ability for only those given a **commissions** permission to administer commissions for both individuals and combinations of individuals.

## Target audience/personas

Haze employees with commission role who will be administering this page.

### Constraints

Deployment Strategy?

Solution overview

Functional requirements

New Commissions Role     Only people with memorism role may administer the commissions page.     Only people with memorism role may view link to the commissions page from the sidebar.
